

Description:

Quickfix Wemlac Paint Stripper is a solvent based, non-caustic, heavy bodied paint remover for stripping most types of household and industrial paints. **Wemlac Paint Stripper** is an activated, carefully balanced solvent formulation.

Application Area:

Wemlac Paint Stripper can be used to remove most commonly used Paints, lacquers, Enamels, Polish, Varnish, Shellac, Melamine, Polyurethane & More

Typical Properties

Appearance:

White Liquid

Specific Gravity:

1.15 approx.

Method of Use:

1. Slowly open the Wemlac Paint Stripper container to prevent sudden release of pressure.
2. Clean the surface if it's greasy or dirty by washing with a degreaser or warm soapy water.
3. Lightly sand the surface to help loosen the paint.
4. Pour a suitable amount of paint stripper into an open container.
5. Apply a thick layer of the stripper onto the painted area using a soft brush. Only treat as much surface as can be removed before the product dries.
6. Allow the stripper to act for 5 to 10 minutes until the paint starts to bubble, soften, or peel.
7. Use a scraper to gently remove the softened paint.
8. For any remaining paint residue, scrub timber with dry steel wool and metal with steel wool or scouring pads.
9. Rinse and clean the surface thoroughly using water or methylated spirits along with steel wool or a scouring pad.
10. Let the surface dry completely. Once dry, it is ready for repainting or sanding.
